

2011 Global IPO Update (January – November)

December 2011

January – November 2011 key highlights

Global IPO activity by number of IPOs was lower in the first 11 months of 2011 (1,117 deals) compared to the full year 2010 (1,393 deals).

20% less IPOs in the first 11 months of 2011 than full year 2010.

Total capital raised in the first 11 months of 2011 (US\$155.8 billion) was significantly lower than the full year of 2010 (US\$284.6 billion):

45% less capital raised in first 11 months of 2011 than full year 2010.

January – November 2011 key highlights

Quarter on quarter analysis:

- ▶ **Global IPO volume reached US\$15.1 billion in 148 deals in October and November 2011. There was a 69% decrease by number of deals and 89% lower by capital raised than the US\$131.5 billion raised via 484 deals in the fourth quarter of 2010.**
- ▶ After a strong first six months of 2011, Q3'11 was the lowest quarter by capital raised since Q2'09 (US\$10.4 billion from 82 deals).

Year on year analysis:

- ▶ In the first 11 months of 2011, there were 1,117 deals which raised US\$155.8 billion. This was 8% lower by number of deals and 39% decrease by capital raised than the US\$257.5 billion via 1,215 IPOs for the first 11 months of 2010:
 - ▶ Average deal size decreased in many markets in the first 11 months of 2011 compared to the full year 2010. The global average deal size fell from US\$204.8 million in 2010 to US\$139.5 million in 2011, due to smaller IPOs.
- ▶ The uncertainty around the unanimous resolution around the Eurozone debt crisis and its impact on the global economy has left investors and issuers with a lack of confidence. This had a deep impact on the 11 month's global IPO activity.
- ▶ The key to the IPO market recovery lies in the speedy resolution of the European debt crisis, which is likely to have a stabilizing effect on the global capital market and restore investors and issuers confidence. There is a huge pipeline of private companies globally, waiting to go public as soon as market conditions improve.

January – November 2011 key highlights

▶ **The top three IPOs accounted for 12.8% of the first 11 month's global capital raised.**

- ▶ Swiss commodities trader Glencore International's IPO raised US\$10.0 billion, which constituted 6.5% of global capital raised in the first 11 months of 2011. It is the largest IPO globally so far this year. It is the second largest IPO listed on the London Stock Exchange on record (behind Russian company Rosneft's US\$10.7 billion IPO listing in July 2006) and the fourth largest IPO by a European issuer on record. It is also the largest non-Asian IPO completed on Hong Kong Stock Exchange (HKEx) on record.
- ▶ Hong Kong's Hutchison Port Holding Trust raised US\$5.4 billion which constituted 3.5% of global capital raised in the 11 months of 2011. It is the largest IPO listed on Singapore Stock Exchange on record (topping the October 2010 Singaporean Global Logistic Properties listing worth US\$3.0 billion).
- ▶ Spanish commercial bank, Bankia raised US\$4.4 billion in July, which constituted 2.8% of the 11 months' global capital raised. It is the third largest IPO globally so far this year. It is the second largest IPO on Bolsa de Madrid ever (behind the wind power generation company Iberdrola Renovables SA's US\$6.6 billion listing in Q4'07).

▶ **The top 20 IPOs accounted for 33.4% of the first 11 month's global capital raised.**

- ▶ There were 19 deals with capital raised above US\$1 billion in the first 11 months of 2011, compared to 36 deals in the full year of 2010. Of the 19 deals, nine deals were from Greater China, four deals were from US, the rest were from Argentina, Italy, Poland, Russian Federation, Spain and Switzerland (one deal each).
- ▶ **Emerging markets** made up around 68.4% by global number of deals and 60.5% by amount of capital raised in the first 11 months of 2011.** Of the top 10 IPOs (by capital raised), 4 deals were from emerging countries. Of the top 20 IPOs, 13 deals were from emerging countries.
- ▶ BRIC markets recorded 385 deals and US\$66.7 billion, or 34% of global number of deals and 43% of total capital raised in the first 11 months of 2011. This compares with US\$130.5 billion via 573 deals in the full year of 2010.

** Please see the Appendix for the definition of emerging markets issuers.

January – November 2011 key highlights

Appendix: definitions

- ▶ The data presented in the Ernst & Young *Global IPO trends 2011 report and Year End Global IPO update* and press releases are from Dealogic, Thomson Reuters and Ernst & Young. **The *Year End Global IPO update* covers global IPO activity from 1 January to 30 November 2011.**
- ▶ For the purposes of these reports and press releases, we focus only on IPOs of operating companies and define an IPO as follows:
 - ▶ A company's first offering of equity to the public.
- ▶ This report includes only those IPOs for which Dealogic, Thomson Financial and Ernst & Young offer data regarding the issue date (the day the offer is priced and allocations are subsequently made), trading date (the date on which the security first trades) and proceeds (funds raised, including any over-allotment sold). Postponed IPOs or those which have not yet been priced are therefore excluded. Over-the-counter (OTC) listings are also excluded.
- ▶ In an attempt to exclude non-operating company IPOs such as trusts, funds and special purpose acquisition companies (SPACs), companies with the following Standard Industrial Classification (SIC) codes are excluded:
 - ▶ 6091: Financial companies that conduct trust, fiduciary and custody activities
 - ▶ 6371: Asset management companies such as health and welfare funds, pension funds and their third-party administration as well as other financial vehicles
 - ▶ 6722: Companies that are open-end investment funds
 - ▶ 6726: Companies that are other financial vehicles
 - ▶ 6732: Companies that are grant-making foundations
 - ▶ 6733: Asset management companies that deal with trusts, estates and agency accounts
 - ▶ 6799: Special Purpose Acquisition Companies (SPACs)
- ▶ We also applied the above SIC exclusion criteria for the follow on activity analysis.
- ▶ In our analysis, unless stated otherwise, IPOs are attributed to the domicile nation of the company undertaking an IPO. The primary exchange on which they are listed is as defined by Dealogic, Thomson Financial and Ernst & Young research. A foreign listing is where the stock exchange nation of the company is different from the company's domicile nation (i.e., issuer's nation). For IPO listings on HKEx, SSE, SZE, WSE, NewConnect, TSX and TSX-V exchanges, we use their first trading date in place of issue date.
